## Use Case: Customize Avatar

**Iteration:** 1.

**Primary Actor:** Player.

**Goal in Context:** Allows the player to select or change their avatar to personalize their profile image.

**Preconditions:** The player is logged into their account and has access to the profile customization page.

**Trigger:** The player selects the option to customize their avatar from the customization interface.

**Scenario:**
1. The player selects the avatar customization option.
2. A selection of available avatars is displayed (ex: default and unlocked options).
3. The player chooses a new avatar.
4. The system saves the selection, updating the player's profile with the new avatar.

**Post-Conditions:**
- The selected avatar is updated on the profile and visible to others.

**Exceptions:**
1. If the avatar selection fails to load, an error message appears, redirecting the player to the main customization page.
2. If the selected avatar cannot be saved, an error message prompts the player to try again.

**Priority:** Medium.

**When Available:** First Iteration.

**Frequency of Use:** Frequent. Whenever the player wishes to update their avatar.

**Channel to Actor:** Player interacts with the avatar selection option via the GUI.

**Secondary Actor:** N/A.

**Channel to Secondary Actor:** N/A.

**Open Issues:**
- Will players need to unlock certain avatars through in-game actions or purchases?
